The biological and geological future of Earth can be extrapolated based upon the estimated effects of several long-term influences. These include the chemistry at Earth's surface, the rate of cooling of the planet's interior, the gravitational interactions with other objects in the Solar System, and a steady increase in the Sun's luminosity. An uncertain factor in this extrapolation is the ...

Climate change is a change in the statistical distribution of weather patterns when that change lasts for an extended period of time (i.e., decades to millions of years). Climate change may refer to a change in average weather conditions, or in the time variation of weather within the context of longer-term average conditions.

One part of a recent survey caught my attention: The strongest correlate of opinion on climate change is partisan affiliation. Two-thirds of Republicans (67%) say either that the Earth is getting warmer mostly because of natural changes in the atmosphere (43%) or that there is no solid evidence the Earth is getting warmer (24%).

Introduction. Atlantis is the subject of a legend about an advanced island civilization that was destroyed or lost. Stories about Atlantis are first mentioned in Platoâ€™s dialogues Timaeus and Critias, in which characters say it was destroyed by an earthquake or a tsunami about 9,000 years before the time in which

Plato wrote.

TABLE OF CONTENTS . PREFACE. THE gracious reception given to my several reports of field studies among primitive racial groups and the many requests for copies of those brief reports and for further data, together with the need for providing interpretations and applications of the data, have induced me to consolidate my investigations. There have also been many requests from my patients and ...

Introduction. Plastic is a material that has existed for over one century, and provides a wide range of societal benefits in the fields of industry, construction, medicine and food preservation (Geyer et al., 2017). Plastic became soon a basic component for manufacturing numerous everyday products, and since the 1950s, its production has increased exponentially (PlasticsEurope, 2017).
