Accounting or accountancy is the measurement, processing, and communication of financial information about economic entities such as businesses and corporations. The modern field was established by the Italian mathematician Luca Pacioli in 1494. Accounting, which has been called the "language of business", measures the results of an organization's economic activities and conveys this ...

The paper seeks to contrast the roles that have been claimed on behalf of accounting with the ways in which accounting functions in practice. It starts by examining the context in which rationales for practice are articulated and the adequacy of such claims.

The roles of accounting in organizations and society

In conventional accounting literature, "transfer pricing" is portrayed as a technique for optimal allocation of costs and revenues among divisions, subsidiaries and joint ventures within a group of related entities.

The dark side of transfer pricing: Its role in tax
