This paper examines the relation between annual report readability and firm performance and earnings persistence. I measure the readability of public company annual reports using the Fog index from the computational linguistics literature and the length of the document.

Annual report readability, current earnings, and earnings

Debits and credits occur simultaneously in every financial transaction in double-entry bookkeeping. In the accounting equation, $Assets = Liabilities + Equity$, so, if an asset account increases (a debit (left)), then either another asset account must decrease (a credit (right)), or a liability or equity account must increase (a credit (right)). Note also that in the extended equation, revenues ...
