

crop post harvest science pdf

COWPEA: Post-harvest Operations Page 2 Preface The present work provides information related to cowpea crops and mostly on cowpea post-harvest operation in developing countries.

COWPEA - Food and Agriculture Organization of the United

Agriculture is the cultivation of land and breeding of animals and plants to provide food, fiber, medicinal plants and other products to sustain and enhance life. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The study of agriculture is known as agricultural ...

California Agriculture - Current issue and featured articles. Alternaria late blight (ALB), caused mainly by the fungal pathogen *Alternaria alternata*, is an important pistachio disease that causes severe tree defoliation and fruit shell staining. Its control relies on multiple fungicide sprays, including carboxamide fungicides.

A cash crop or profit crop is an agricultural crop which is grown to sell for profit. It is typically purchased by parties separate from a farm. The term is used to differentiate marketed crops from subsistence crops, which are those fed to the producer's own livestock or grown as food for the producer's family. In earlier times cash crops were usually only a small (but vital) part of a farm's ...

ABSTRACT. The objective of this study was to identify fungi and bacteria associated with the post-harvest rot of ginger rhizomes (*Zingiber officinale* Roscoe) in the Serrana region of Espírito Santo, Brazil. Rhizomes with symptoms of rot were sampled in the packing-house and in the field soon after harvest.

This section introduces a range of climate-smart agriculture (CSA) practices and technologies within seven entry points for CSA; soil management, crop management, water management, livestock management, forestry, fisheries and aquaculture, and energy management. Practices are understood broadly as ways of doing things, for example, precision farming, tillage, and fertilization; these are all ...

Practices | Climate-Smart Agriculture Guide

Temperature is a primary factor affecting the rate of plant development. Warmer temperatures expected with climate change and the potential for more extreme temperature events will impact plant productivity.

Temperature extremes: Effect on plant growth and

Non-pareil (NP) nuts split first and have the most value. Not surprising, the primary focus in NOW management is protecting NP nuts. The worst NOW damage to NP nuts occurs if the nuts are still in the trees when 3rd generation NOW egg laying begins. Harvest should occur when 100% of the nuts have split but the hulls are still green (see picture below).

Harvesting marijuana is a bit like harvesting grapes (or other fruits). The longer you wait, the more potent the grape is and the stronger the alcohol. With marijuana, the longer you wait, the more cannabinoids there will be --, and that means a stronger product. The timing of the harvest is often ...

When And How To Harvest Marijuana Plants

Last week I wrote about the anti-science campaign being waged by opponents of the use of genetically modified organisms in agriculture. In that post, I promised to address a series of questions/fears about GMOs that seem to underly peoples'™ objections to the technology.

The anti-GMO campaign's™ dangerous war on science

The sugars and organic acids present in the pulp of Keitt mangoes at various stages of ripeness were analysed by h.p.l.c. Ripening was associated with a loss in firmness, peel chlorophyll and pulp acidity, with increasing soluble solids and total sugars.

Analysis of sugars and organic acids in ripening mango

Staking and Pruning. Most commercial determinate tomatoes are produced using short stake culture for trellising. This type of culture produces fruits that are higher in quality and easier to harvest and enhances spray coverage.
