The 2018 Living Planet report from the World Wildlife Foundation has found that a shocking 60% of the earth's mammals, birds, fish and reptiles have been killed by human activity since 1970.. The findings have led the world's foremost experts to warn that the annihilation of wildlife is now an emergency that threatens all human life on this planet.

### **THE GLOBAL ENVIRONMENTAL CRISIS - World Future Fund**

Environmental history is the study of human interaction with the natural world over time, emphasising the active role nature plays in influencing human affairs and vice versa.. Environmental history emerged in the United States out of the environmental movement of the 1960s and 1970s, and much of its impetus still stems from present-day global environmental concerns.
