

## general relativity wald solutions pdf

General relativity (GR, also known as the general theory of relativity or GTR) is the geometric theory of gravitation published by Albert Einstein in 1915 and the current description of gravitation in modern physics. General relativity generalizes special relativity and Newton's law of universal gravitation, providing a unified description of gravity as a geometric property of space and time ...

In general relativity, a geodesic generalizes the notion of a "straight line" to curved spacetime. Importantly, the world line of a particle free from all external, non-gravitational force, is a particular type of geodesic. In other words, a freely moving or falling particle always moves along a geodesic. In general relativity, gravity can be regarded as not a force but a consequence of a ...

Die allgemeine Relativit sttheorie (kurz ART) beschreibt die Wechselwirkung zwischen Materie (einschlie lich Feldern) einerseits sowie Raum und Zeit andererseits. Sie deutet Gravitation als geometrische Eigenschaft der gekr mmten vierdimensionalen Raumzeit. Die Grundlagen der Theorie wurden ma igeblich von Albert Einstein entwickelt, der den Kern der Theorie am 25.
