3 festations. Boddington defined as: Statistics is the science of estimates and probabilities. Further, W.I. King has defined Statistics in a wider context, the science of Statistics is the method of judging collective, natural or social phenomena from the results obtained by the analysis or enumeration or collection of estimates.

## **AN INTRODUCTION TO BUSINESS STATISTICS**

Second, a focus on practices (in the plural) avoids the mistaken impression that there is one distinctive approach common to all scienceâ€™a single â€™scientific methodâ€™â€™or that uncertainty is a universal attribute of science.

Statistics is a branch of mathematics dealing with data collection, organization, analysis, interpretation and presentation. In applying statistics to, for example, a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model process to be studied. Populations can be diverse topics such as "all people living in a country" or ...

In computer science, an interpreter is a computer program that directly executes, i.e. performs, instructions written in a programming or scripting language, without requiring them previously to have been compiled into a machine language program. An interpreter generally uses one of the following strategies for program execution: parse the source code and perform its behavior directly;
