Guideline on Management of Acute Dental Trauma

This report was produced under the overall direction of Ivan Ivanov. The data collection was facilitated by Rokho Kim, Said Arnaout, Hisashi Ogawa, Thebe Pule, Habib Saiyed, and Mauritz Tennessee.

WHO Global Plan of Action on Workers' Health (2008-2017)

Injectable filler (injectable cosmetic filler, injectable facial filler) is a soft tissue filler injected into the skin to help fill in facial wrinkles, restoring a smoother appearance. Most of these wrinkle fillers are temporary because they are eventually absorbed by the body. Some people may need more than one injection to achieve the wrinkle-smoothing effect.

Injectable filler - Wikipedia

A facial cleft is an opening or gap in the face, or a malformation of a part of the face. Facial clefts is a collective term for all sorts of clefts. All structures like bone, soft tissue, skin etc. can be affected. Facial clefts are extremely rare congenital anomalies. There are many variations of a type of clefting and classifications are needed to describe and classify all types of clefting.

OB in the News System 360. And a task force is really nothing other than a temporary cross-functional team. Similarly, committees composed of members from across departmental lines are another example of cross-functional teams. But the popularity of cross-discipline work teams exploded in the late 1980s.

Infantile hemangiomas (IHs) are the most common tumors of childhood. Unlike other tumors, they have the capacity to involute after proliferation, often leading primary care providers to assume they will resolve without intervention or consequence. However, a subset of IHs may be associated with complications, resulting in pain, functional impairment, or permanent disfigurement.
