

### **oxidative stress in human pdf**

Oxidative stress is essentially an imbalance between the production of free radicals and the ability of the body to counteract or detoxify their harmful effects through neutralization by antioxidants.

### **What is Oxidative Stress? - News-Medical.net**

1. Introduction1.1. The concept of "oxidative stress" The term "oxidative stress" began to be used frequently in the 1970s, but its conceptual origins can be traced back to the 1950s to researchers pondering the toxic effects of ionizing radiation, free radicals, and the similar toxic effects of molecular oxygen (Gerschman et al., 1954), and the potential contribution of such processes ...

536 JMAJ, December 2001"Vol. 44, No. 12 N. NODA and H. WAKASUGI tobacco smoke that cause oxidative stress. Such stress can also arise from drugs (including anti-cancer drugs) that are used in medical practice.

### **Cancer and Oxidative Stress - Med**

Introduction. Oxidative stress is defined as an imbalance between production of free radicals and reactive metabolites, so-called oxidants or reactive oxygen species (ROS), and their elimination by protective mechanisms, referred to as antioxidants.

### **Oxidative stress, inflammation, and cancer: How are they**

Oxidative stress is a normal phenomenon in the body. Under normal conditions, the physiologically important intracellular levels of reactive oxygen species (ROS) are maintained at low levels by various enzyme systems participating in the in vivo redox homeostasis. Therefore, oxidative stress can also be viewed as an imbalance between the prooxidants and antioxidants in the body.

### **Oxidative Stress, Prooxidants, and Antioxidants: The Interplay**

Increasing numbers of individuals, particularly the elderly, suffer from neurodegenerative disorders. These diseases are normally characterized by progressive loss of neuron cells and compromised motor or cognitive function. Previous studies have proposed that the overproduction of reactive oxygen species (ROS) may have complex roles in promoting the disease development.

Metabolism, like other aspects of life, involves tradeoffs. Oxidant by-products of normal metabolism cause extensive damage to DNA, protein, and lipid. We argue that this damage (the same as that produced by radiation) is a major contributor to aging and to degenerative diseases of aging such as cancer, cardiovascular disease, immune-system decline, brain dysfunction, and cataracts.

Superoxide dismutase [Cu-Zn] also known as superoxide dismutase 1 or SOD1 is an enzyme that in humans is encoded by the SOD1 gene, located on chromosome 21.SOD1 is one of three human superoxide

dismutases. It is implicated in apoptosis and amyotrophic lateral sclerosis.

### **SOD1 - Wikipedia**

Hormesis is any process in a cell or organism that exhibits a biphasic response to exposure to increasing amounts of a substance or condition. Within the hormetic zone, there is generally a favorable biological response to low exposures to toxins and other stressors. Hormesis comes from Greek ἄρμῆσις "rapid motion, eagerness", itself from ancient Greek ἄρμῆν "to set in motion, impel ...

### **Hormesis - Wikipedia**

According to the free radical theory of aging, first outlined in 1956, free radicals break cells down over time. As the body ages, it loses its ability to fight the effects of free radicals. The ...
