Feature Visualization by Optimization. Neural networks are, generally speaking, differentiable with respect to their inputs. If we want to find out what kind of input would cause a certain behavior – whether that's an internal neuron firing or the final output behavior – we can use derivatives to iteratively tweak the input towards that goal .

Circle of Competence. Charlie Munger and Warren Buffett know what they're good at, and what they're bad at. (He explains in Poor Charlie's Almanack why Berkshire Hathaway doesn't invest in technology companies.) Don't get overconfident and subject to the Twaddle tendency where you think you know a lot more than you do – this can cause terrible mistakes.
